Professional Summary

Junior Fullstack Software Engineer with a frontend focus and an Informatics Engineering degree (GPA 3.88/4.00). Builds responsive web apps with React, Next.js, TypeScript and Tailwind CSS, and REST APIs with Node.js/Express and Flask. Raised a landing page's Lighthouse score from 68 to 92 as a Front-End intern, and led a 5-person team to an 87/100 final score in the DBS Foundation x Dicoding capstone. Seeking junior Fullstack, Frontend or Backend roles, open to remote.

Work Experience

Front-End Developer Intern | Oct 2025 - Jan 2026 | PT Teknologi Edukasi Indonesia

- Redesigned the Luarsekolah landing page with Laravel Blade and Tailwind CSS, raising its desktop Lighthouse Performance score from 68 to 92 (+24 points) through code refactoring and PNG-to-WebP image conversion.
- Developed 8+ reusable Blade components to reduce template duplication.
- Integrated 3 demo API endpoints returning site-related JSON data to render dynamic content.
- Collaborated with 4 other developers via daily standups, pull requests and pre-merge code reviews.

Front-End & Back-End Developer (Team Lead) | May 2025 - Jul 2025 | Nutrilance Capstone, DBS Foundation x Dicoding

- Led a 5-person team to build Nutrilance, an ML app for personalized diet plans, food recommendations and recipes.
- Aligned the team on shared goals through weekly meetings, defining most tasks through group discussion so work was divided fairly and evenly; final score 87/100.
- Built the complete responsive React.js and Tailwind CSS frontend, reaching a Lighthouse Performance score of 88.
- Developed the Flask REST APIs (SQLite) that deliver the ML model's predictions to the UI.

Projects

Job Application Tracker | Personal Project | github.com/Deqii/dq-job-tracker

- Built a full-stack job application tracker as an npm workspaces monorepo: React 18, Vite, TypeScript, TanStack Query and Tailwind CSS frontend with an Express REST API using Prisma and MySQL.
- Implemented JWT authentication with bcrypt, a status pipeline with an append-only history timeline, a dashboard with response rate, and server-side Excel (.xlsx) export with ExcelJS; tested with Vitest, Testing Library and Supertest.

Daily Tracker | Personal Project | dq-daily-tracker.vercel.app | github.com/Deqii/daily-tracker

- Built and deployed on Vercel a gamified habit tracker (Svelte, TypeScript, Vite): daily quests across five stats, XP, ranks E to S, streaks and a rewards wallet; data stays in localStorage with JSON export and import.
- Wrote the rules engine (points, ranks, streaks, penalties) as framework-free TypeScript with Vitest unit tests, and set up CI with Playwright visual tests that compare each page against its HTML prototype.

Education

Universitas Sangga Buana YPKP | Oct 2022 - Oct 2026 | Bachelor of Engineering, Informatics Engineering | GPA 3.88/4.00

- Thesis: melinjo seed ripeness classifier (scikit-learn, Flask web app), 96.25% test accuracy on 4 classes.

Skills

Languages: JavaScript (ES6+), TypeScript, PHP, Python, SQL, HTML/HTML5, CSS/CSS3
Frontend: React.js, Next.js, Svelte, TanStack Query, Tailwind CSS
Backend: Node.js, Express.js, Laravel (Blade), Flask, RESTful API design, JWT authentication
Databases: MySQL, MongoDB, SQLite, Prisma ORM
Testing: Unit testing (Vitest), React Testing Library, Supertest, Playwright
Tools: Git (version control), GitHub, GitHub Actions (CI), Postman, Vercel, ESLint, Prettier, AI-assisted development (Claude, OpenCode, Antigravity)
Practices: Responsive design, REST API integration, Web performance optimization (Lighthouse, WebP), Code review
Data/ML: Machine Learning (scikit-learn, Random Forest)

Certifications

- TOEFL Prediction Test, score 613, Central Course | Aug 2026
- AI Class ASEAN and AI Ready ASEAN, ASEAN Foundation x Google.org | Aug 2026
- Coding Camp 2025 powered by DBS Foundation, Dicoding x DBS Foundation | Jul 2025
- React, The Complete Guide 2025 (incl. Next.js, Redux), Udemy | Jun 2025
- Belajar Pengembangan Web Intermediate (Web Development), Dicoding | Jun 2025
